

AZtec Feature – course agenda

AZtec Feature

Introduction to the system

Overview of application

Data acquisition

- Setting up image parameters
- Setting up X-ray parameters
- Single field analysis
- Automate -Defining area layouts (Automate)
- Multiple area analysis (Automate)
- Classifications
- Reviewing Feature data
- Exporting data

Classification

- Setting up classification schemes
- Presenting results

Automated acquisitions

- Ways of automation
- Large Area analysis
 - Images
 - Maps
- Automation in Feature analysis

Montage of data

- Montaging images maps and feature runs
- Alignments
- Considerations and limitations

Advanced operation

- Second pass
- Filters
- Optimizing settings and optimizing speed
- User profiles and applications
